

Our Impact

We're committed to partnering with the best in the ecosystem to combine our deep scientific expertise with the expertise of the tech world.

One of the first companies to partner with the Novartis Biome back in 2018, Hemex Health launches a new portable diagnostic platform that could change the way sickle cell disease is tested, and offer a model for developing point of care tests for a range of diseases in low-resource settings.

Hemex Health was founded in 2016 to bring the power of advanced technology to the point of need. Its breakthrough diagnostic tools aimed at detecting sickle cell disease and malaria, shows the power of coming together to innovate and co-develop digital solutions at scale.

About Us

We created the Novartis Biome as a bridge to help our partners become an extension of our own teams, working with us as easily and productively as possible to jointly innovate and co-develop digital solutions at scale.

□

Collaborate with Us

We believe in uniting the best of science and technology to create better healthcare solutions and seamless experiences for patients and caregivers, at scale.

□

News and Stories

A digital health revolution is underway. Find out more about our approach to drive impact at scale - to offer new hope to patients and healthcare providers alike.
